Summary

Software Engineering student specializing in backend development and data-intensive applications. Experienced building scalable APIs, real-time systems, and automation pipelines using Python, Django, FastAPI, NestJS, Docker, and AWS. Open-source contributor to Django. Huawei ICT Global Stage award winner.

Technical Skills

Languages: Python, TypeScript/JavaScript, Java, Go

Backend: Django, FastAPI, Flask, NestJS, Spring Boot

Frontend: React, Next.js, Tailwind CSS

Databases & Messaging: PostgreSQL, OracleDB, Redis, RabbitMQ, Celery

DevOps & Cloud: Docker, Kubernetes, AWS (EC2, S3, Lambda), Apache Airflow, Linux, Git

Tools & Methods: Scrapy, Selenium, BeautifulSoup, REST, GraphQL, WebSockets, Scrum

Experience

Software Engineer (Part-time) Sep 2025 – Dec 2025
Makkyt *Remote*
- Built a scalable data collection backend processing **10,000+ records/day**; automated workflows with **Apache Airflow**.
- Developed and maintained Django production applications ensuring high availability.

Software Engineer Intern Jun 2025 – Sep 2025
Makkyt *Remote*
- Designed **FastAPI** REST services with **sub-second response times**; managed **PostgreSQL** with 10k+ indexed records.
- Built Python scrapers integrated into the backend data ingestion pipeline.

Python Developer (Freelance) Aug 2022 – Present
Upwork *Remote*
- Delivered backend APIs, data pipelines, and automation scripts for clients using Django, FastAPI, and Scrapy.

Open Source Contributions

Django | github.com/django/django 2026
- Prevented a `ValueError` in `FileBasedCache.touch()` for expired keys; fix submitted via Django's official contribution workflow.

Projects

Collaborative Real-Time Code Editor | *Next.js, NestJS, Socket.IO, Redis* | Portfolio
- Built a Google Docs-like multi-user code editor with **WebSocket** sync, document persistence, and VS Code-quality editing.
- **NestJS** backend, **Redis** pub/sub for state, **Next.js** frontend — real-time collaboration at scale.

Command-Line Chat Application | *Django, Celery, RabbitMQ*
- Implemented distributed async message handling with **Celery** and **RabbitMQ** — hands-on message queue infrastructure.

Scientific Article Classification — GNN | *PyTorch Geometric, NetworkX, scikit-learn*
- Trained a GNN model classifying **10,000+ articles** into **20+ domains** at **89% accuracy** using Node2Vec + GCN.

Education

Faculty of Sciences and Technologies, Errachidia Sep 2024 – Jun 2027
Engineering Degree, Software Engineering and Artificial Intelligence

Faculty of Sciences and Technologies, Errachidia Sep 2021 – Jul 2024
Bachelor of Science and Technology, Software Engineering

Certifications

Oracle Cloud Infrastructure DevOps Professional
Meta Back-End Developer Certificate | Meta
Intermediate Machine Learning | Kaggle

Awards

3rd Prize, Huawei ICT Competition — Global Stage (Computing Track, China, 2025)
29th Place, Moroccan National Programming Contest (out of 90 teams, 2024)
